

## QHSE and R&D&i Policy

---

Astilleros Canarios S.A. (ASTICAN), aware that its presence in the market depends on the continuous satisfaction of its Customers, on the fulfillment of applicable legal requirements, as well as on other commitments made or requested by customers and other stakeholders and specially, on the control and continuous improvement of the requirements of the International Standards of Management Systems contained in the ISO-EN-UNE 9001 and 14001, PECAL/AQAP-2110, UNE 166002, and OHSAS 18.001.

ASTICAN, to implement its quality policy, is committed to the following objectives:

- To permanently adapt the Management Systems to updated versions of international standards.
- To continuously improve the Management Systems and its goals through the established procedures in the system.
- To provide our organization a suitable structure to develop projects, with the capacity of measuring and reviewing the proposed targets and policies.
- To articulate the quality, innovation, safety and environment requirements of our customers and to evaluate compliance with their expectations.
- To improve our competitiveness through innovation, increasing productivity, optimizing costs and improving the professional quality of life of our employees.
- To prevent non-conformities and promote the immediate detection, whether, if it occurs and the implementation of corrective actions to prevent a repetition.
- To involve all levels of the organization, involved in the Management Systems, in order that both the quality policy and its objectives, are understood, implemented and daily updated.
- To set measurable objectives that respond to identified needs in the current market situation and considering emerging technologies.
- To prevent any type of environmental incident and minimize the residues generated.
- To prevent all types of incidents and accidents, or any aspect that might adversely affect the safety and health of workers.
- To strengthen human and technical capacities, providing development options and providing material resources to achieve the objectives of the Management Systems.

José Carlos Álvarez Pérez  
Managing Director
